```java
class Person {
    private String name;
    private int age;

    public Person(String name, int age) {
        this.name = name;
        this.age = age;
    }

    public String getName() {
        return name;
    }

    public int getAge() {
        return age;
    }

    public void setName(String name) {
        this.name = name;
    }

    public void setAge(int age) {
        this.age = age;
    }
}

public class Lifecycle {

    public static void main(String[] args) {
        Person person = new Person("Aadith", 22);

        person.setAge(31);

        System.out.println("Name: " + person.getName());
        System.out.println("Age: " + person.getAge());

        person = null;
    }

}
```

Output

```
Name: Aadith
Age: 31
```
